Faculty of Computer Science and Mathematics

Lab Exercise 1

Name:	MUHAMAD ARIF BIN ZAKERI
Matric Num:	S79184

Overview:

This in-class exercise extends Lab Exercise 1. In addition to the basic tags you have practised (headings, paragraphs, lists, links and images), you will apply further HTML elements covered in Chapter 3: description lists, blockquote, special characters, e-mail links, relative links, proper nesting and HTML validation.

There are two problems. Your lecturer will assign one problem to you, or you may be asked to complete both.

Learning Outcomes

1. Build a well-structured HTML5 document using correct head and body sections.

2. Use ordered, unordered and description lists appropriately.

3. Create absolute, relative and e-mail hyperlinks.

4. Identify and correct HTML syntax and nesting errors, and validate code using the W3C Validator.

Best of luck!

Problem A: Local Business Web Page

A small local business near your campus (for example, a café, bookshop, laundry shop or printing shop) wants a simple one-page website to promote its services. You have been asked to build the first version of the page using HTML only (no CSS). You may use a real business as inspiration, or invent one.

Instructions

Create a file named lab1_ExerA.html that contains the following:

1. A complete HTML5 structure: `<!DOCTYPE html>`, `<html lang="en">`, `<head>` with `<meta charset="utf-8">` and a `<title>` showing the business name.

2. An `<h1>` heading with the business name, followed by a short paragraph introducing the business. Use `<strong>` for the business slogan and `<em>` for at least one word that needs emphasis.

3. An `<h2>` section "Our Menu / Services" using a description list (`<dl>, <dt>, <dd>`) with at least 4 items. Each `<dt>` is the item name and each `<dd>` gives a short description and price (e.g. RM 5.50).

4. An `<h2>` section "How to Order" using an ordered list (`<ol>`) with 3–5 steps.

5. An `<h2>` section "Facilities" using an unordered list (`<ul>`) with at least 3 items.

6. An `<h2>` section "What Our Customers Say" containing one customer review inside a `<blockquote>` element.

7. An image related to the business using `<img>` with a meaningful alt attribute.

8. Contact information that includes:

   (i) the business address, using `<br>` to separate address lines

   (ii) an e-mail link using `mailto:`

   (iii) an absolute link to a map or social media page that opens in a new tab (`target="_blank"`).

9. A footer line that uses at least two special characters, e.g. `©` and `&` (example: © 2026 Kopi & Roti Café).

10. Comments (`<!-- ... -->`) explaining each section of your code.

Submission

Save the file as lab1_ExerA.html, validate it at `https://validator.w3.org` (Validate by File Upload), and submit it (Submit lab1_ExerA.html and Screenshot of validation) through Github

Validation:

Showing results for uploaded file lab_ExerA.html (checked with vnu 26.10.18)

Checker Input

Show ☐ source ☐ outline ☐ image report ☐ errors & warnings only Options…

Check by file upload Choose File No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Check

Document checking completed. No errors or warnings to show.

Used the HTML parser.

Total execution time 2 milliseconds.

Output:

Arif Café

Welcome to Arif Café, your friendly place for coffee and light meals near campus. Our slogan is **Fresh Coffee, Happy Minds!** We make every visit *special* with friendly service and affordable prices.

Our Menu / Services

Americano
: Freshly brewed espresso with hot water. Price: RM 5.50.

Café Latte
: Espresso blended with steamed milk. Price: RM 7.00.

Chocolate Muffin
: A soft chocolate muffin baked for a sweet treat. Price: RM 4.00.

Chicken Sandwich
: A toasted sandwich filled with chicken and fresh vegetables. Price: RM 8.50.

How to Order

1. Visit our café or contact us by e-mail.
2. Choose your food and drinks from the menu.
3. Confirm your order with our staff.
4. Make payment and collect your order.

Facilities

- Free Wi-Fi
- Comfortable seating
- Power outlets for laptops
- Takeaway service

What Our Customers Say

> "The coffee is delicious, the prices are reasonable, and it is a great place to study."

Problem B: Campus Club Mini Website (Debugging and Extend)

A junior committee member of the Campus Coding Club wrote the home page below, but it contains many mistakes. Some of them are still displayed by the browser, but the code is not valid HTML. Your tasks are to find and fix the errors, then extend the page into a small two-page website.

Given Code

```
<html>
<head>
<title>Campus Coding Club
<meta charset="utf-8">
</head>
<body>
<h1>Welcome to Campus Coding Club</h2>
<p>We meet every <strong><em>Wednesday</strong></em> at Lab 3.
<h2>Our Activities<h2>
<ul>
<li>Weekly coding sessions
<li>Hackathon</li>
<li>Web design workshop</li>
</ol>
<p>Visit our university: <a href=www.umt.edu.my>UMT Website</a></p>
<img src="club.jpg">
<p>Copyright (c) 2026 Campus Coding Club & Friends</p>
</body>
```

Instructions

Part 1. Find and Fix the Errors

1. Copy the given code into a new file named lab1_ExerB.html.

2. Identify and correct all errors. At the top of the `<body>`, write an HTML comment listing each error and the line number, e.g. `<!-- Error 1 (Line 1): missing <!DOCTYPE html> -->`.

4. Validate your corrected file at `https://validator.w3.org`. Your final page must show "No errors or warnings to show".

Part 2. Extend into a Two-Page Website

5. Create a second page named `contact.html` with the same basic HTML5 structure and a suitable `<title>`.

6. In `contact.html`, add an `<h2>` "Committee Members" section using a description list (`<dl>`): each `<dt>` is a position (President, Secretary, Treasurer, etc.) and each `<dd>` is the member's name. Include at least 3 positions.

7. Add an e-mail link using `mailto:` so visitors can contact the club.

8. Add a navigation line at the top of BOTH pages using relative links, e.g. `<a href="index.html">Home</a> | <a href="contact.html">Contact Us</a>`. Clicking the links must move between the two pages.

9. Add a short quote from the club advisor on index.html using <blockquote>.

10. Use comments to explain each section of your code in both files.

Submission

Save the file as lab1_ExerB.html, validate it at `https://validator.w3.org` (Validate by File Upload), and submit it (Submit lab1_ExerB.html and Screenshot of validation) through Github

Validation(lab1_ExerB and contact)

Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for uploaded file lab1_ExerB.html (checked with vnu 26.10.18)

Checker Input

Show ☐ source ☐ outline ☐ image report ☐ errors & warnings only Options…

Check by file upload Choose File No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

Check

Document checking completed. No errors or warnings to show.

Used the HTML parser.

Total execution time 2 milliseconds.

Rubric

Table A: Rubric for Additional Lab Exercise 1 – Problem A

Criteria	Description	Marks
HTML Structure	Proper use of <!DOCTYPE html>, <html lang="en">, <head> with <meta charset> and <title>, and <body>. Tags are correctly nested and closed.	2
Text Formatting	Correct use of <h1>/<h2>, <p>, , , and <blockquote> for the customer review.	2
Lists	Correct creation of a description list (<dl>, <dt>, <dd>) with at least 4 items, an ordered list and an unordered list , each with appropriate items.	3
Links and Image	Working e-mail link (mailto:), absolute link that opens in a new tab (target="_blank"), and an <img> with a meaningful alt attribute.	2
Special Characters, Comments and File Organization	At least two special characters (e.g. ©, &). Comments explain each section. Code is indented and file is named lab1a.html.	1
Total		**10**

Table B: Rubric for Additional Lab Exercise 1 – Problem B

Criteria	Description	Marks
Error Identification	At least 8 errors correctly identified with line numbers and listed in an HTML comment.	3
Error Correction & Validation	All errors corrected (structure, closing tags, nesting, attributes, special characters). Both pages pass the W3C Validator with no errors.	2
Second Page & Relative Links	contact.html created with correct HTML5 structure. Navigation using relative links works in both directions between the two pages.	2
Description List, E-mail Link & Blockquote	Correct <dl>, <dt>, <dd> for committee members (min. 3), working mailto: link, and advisor quote in <blockquote>.	2
File and Code Organization	Code is indented and commented. Files and folder are named and saved correctly.	1
Total		**10**
